

UNIONAI Ω — TESTNET GENESIS CHECKLIST v1.0

GO/NO-GO dla internal sandbox i testnet genesis

UNIONAI Ω — TESTNET GENESIS CHECKLIST v1.0

Status: GO CONTROLLED

Source of truth: Grassroots Lobbying / KONSULT Ω / 0n40i4

Confirmation code: UNIONAI-GENESIS-0N40I4-20260512

Tryb: publication-ready / internal sandbox before public federation

Cel

Checklista GO/NO-GO dla uruchomienia wewnętrznego sandboxu 18 agentów.

Zakres

Testnet V1 pozostaje internal sandbox. Public federation jest deferred.

Checklist P0

Core

- /health HTTP 200
- /metrics działa
- PostgreSQL online
- Redis online
- Qdrant online
- Docker compose działa lokalnie
- deploy platform działa bez 403

Discovery

- /llms.txt HTTP 200
- /.well-known/agent.json HTTP 200
- /.well-known/unionai.json HTTP 200
- /.well-known/did.json HTTP 200
- /openapi.json HTTP 200

Identity & trust

- 18 agentów ma DID-lite
- trust_score startowy ustawiony

- [] tiers T0-T4 zdefiniowane
- [] human-signed genesis manifests istnieją

Relay

- [] POST /api/relay/send
- [] POST /api/relay/route
- [] UNIONAI-WIRE-v0 parser
- [] relay logs
- [] fallback transport defined

Memory

- [] POST /api/memory/anchor
- [] POST /api/memory/query
- [] memory_anchors table
- [] semantic validation before merge
- [] no PII in anchors

Human override

- [] POST /api/operator/override
- [] freeze relay
- [] freeze memory
- [] export audit
- [] override latency measured

Metrics

- [] semantic_drift_score
- [] relay_latency
- [] replay_consistency
- [] memory_poison_rate
- [] governance_concentration

Warunki GO

- 3 runtime categories exchange intent through Semantic Relay MVP.
- Drift <15%.
- Audit completeness 100%.
- Override functional.
- Replay log available.

Warunki NO-GO

- brak override,
- brak replay,
- brak wire format,
- brak exit protocol,
- memory z PII,
- public testnet bez legal scope.
